## TRANSACTIONS OF THE AMERICAN ELECTROCHEMICAL SOCIETY VOLUME 17

To save **Transactions of the American Electrochemical Society Volume 17** PDF, you should refer to the link listed below and download the ebook or gain access to additional information which are related to TRANSACTIONS OF THE AMERICAN ELECTROCHEMICAL SOCIETY VOLUME 17 ebook.

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 124 pages. Dimensions: 9.7in. x 7.4in. x 0.3in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1910 edition. Excerpt: . . . and some of them are such as might give very incorrect results at very low temperature ranges for which they are not intended; this is due to the fact that for such extreme values a relatively small incorrectness in the constants may give rise to relatively large errors in the results. The equations are really correct only over the measured ranges and then only as far as they agree with these; beyond this in either direction they are only probably so. The sensitiveness of the constants of some of these equations at the low temperatures suggests that perhaps for this reason it might be better to determine them at these low temperatures at which the tests involve less difficulties, and permit of greater accuracy. Attention is here again called to the fact that thruout this paper  $T$  represents the drop of temperature in the electrode and not the furnace temperature, which latter is assumed to be 100 higher. This distinction is important if consistent results are expected. The agreement between these general laws and the observed data is closer and more reliable for copper and iron, especially the former; this suggests that others who may be interested in further algebraic analyses, had better use these sets of values rather than those for graphite and carbon. It may be of interest to notice that by mere changes of the scales, which of course does not change the relations, all the curves for  $S$  may be...
