A8 A31 no. 140 OCLC Number: ocm30577951 Subject: Management information systems -- Standards -- United States. Excerpt: . . . FIPS PUB 140-1 attack. A module is required to either include special environmental protection features designed to detect fluctuations and zeroize critical security parameters, or to undergo rigorous environmental failure testing that provides a reasonable assurance that the module will not be affected by fluctuations outside of the normal operating range in a manner that can compromise the security of the module. Level 4 allows software cryptography in multi-user timeshared systems when a B2 or equivalent trusted operating system is employed. A B2 trusted operating system provides additional assurances of the correct operation of the security features of the operating system. 2 DEFINITIONS AND ACRONYMS 2. 1 Definitions The following definitions are used throughout this standard: Automated key distribution: the distribution of cryptographic keys, usually in encrypted form, using electronic means, such as a computer network (e. g. , down-line key loading, the automated key distribution protocols of ANSI X9. 17). Compromise: the unauthorized disclosure, modification, substitution or use of sensitive data (including plaintext cryptographic keys and other critical security parameters). Confidentiality: the property that sensitive information is not disclosed to unauthorized individuals, entities or processes. Control information: information that is entered into a cryptographic module for the purposes of directing the operation of the module. Critical security parameters: security-related information (e. g. , cryptographic keys, authentication data such as passwords and PINs) appearing in plaintext or otherwise unprotected form...
