Reviews

A high quality pdf as well as the typeface applied was exciting to see. It really is writter in simple words and phrases rather than difficult to understand. You will not really feel monotony at at any time of your time (that's what catalogs are for relating to in the event you question me).
(Robyn Nolan)

CRC Press. Hardcover. Book Condition: New. Hardcover. 160 pages. Dimensions: 8.6in. x 5.9in. x 0.7in.In The History and Function of the Target Cities Management Information Systems, youll travel to six major cities in the Target Cities demonstration project sponsored by the Substance Abuse and Mental Health Services Administrations Center for Substance Abuse Treatment (CSAT). Youll see how treatment centers are developing automated management information systems that have been proven to more effectively and efficiently meet the needs of patients requiring addiction recovery and treatment in large metropolitan areas. Your understanding of what it takes to develop, run, and maintain automated management information systems will increase as you read these firsthand accounts of specialists who have taken their own systems through the stages of initial development, to ongoing maintenance, and to eventual evolution. The History and Function of the Target Cities Management Information Systems provides an excellent forum of discovery in which you have everything you need to fully compare and contrast how various local conditions have impacted the growth of these citiesinformation systems and how individual problems can be solved. Several real-world views of these and many other specific topics in these metropolitan areas of the country are at your fingertips: how central intake sites provide rapid assessment, referral, and care management in Cleveland, Ohiofacilitating automated client assessment, referral, and service tracking in Portland, Oregonhow central intake units (CIUs) and a computerized management information system (MIS) reduce barriers to treatment entry, increase treatment retention, and support continued posttreatment recovery in Dallas, Texasthe St. Louis, Missouri, information system that was conceptualized and implemented statewidethe patient tracking system (PTS) in New Orleans, Louisianalessons learned in Detroit, Michigan, by staff using a management information system with a terminal-host model and character-based user interfaceThis is the only known published description of automated systems being...
